Profile

I have been learning programming for 1.5 years. I started my studying with the Hexlet platform. On hexlet all front-end development. Successfully completed 2 projects (1 project - website layout, 2 project - a set of 5 mathematical console games).

After this there was a break from studying. In March 23, successfully passed intensive **School 21 from Sber**. Started the main course on April 26 training program. From now on I spend all my free time on education. During this period, completed 10 school projects.

In September I did a test task for **cloud.ru**, where I met ansible, kubernetes, helm.

Skills

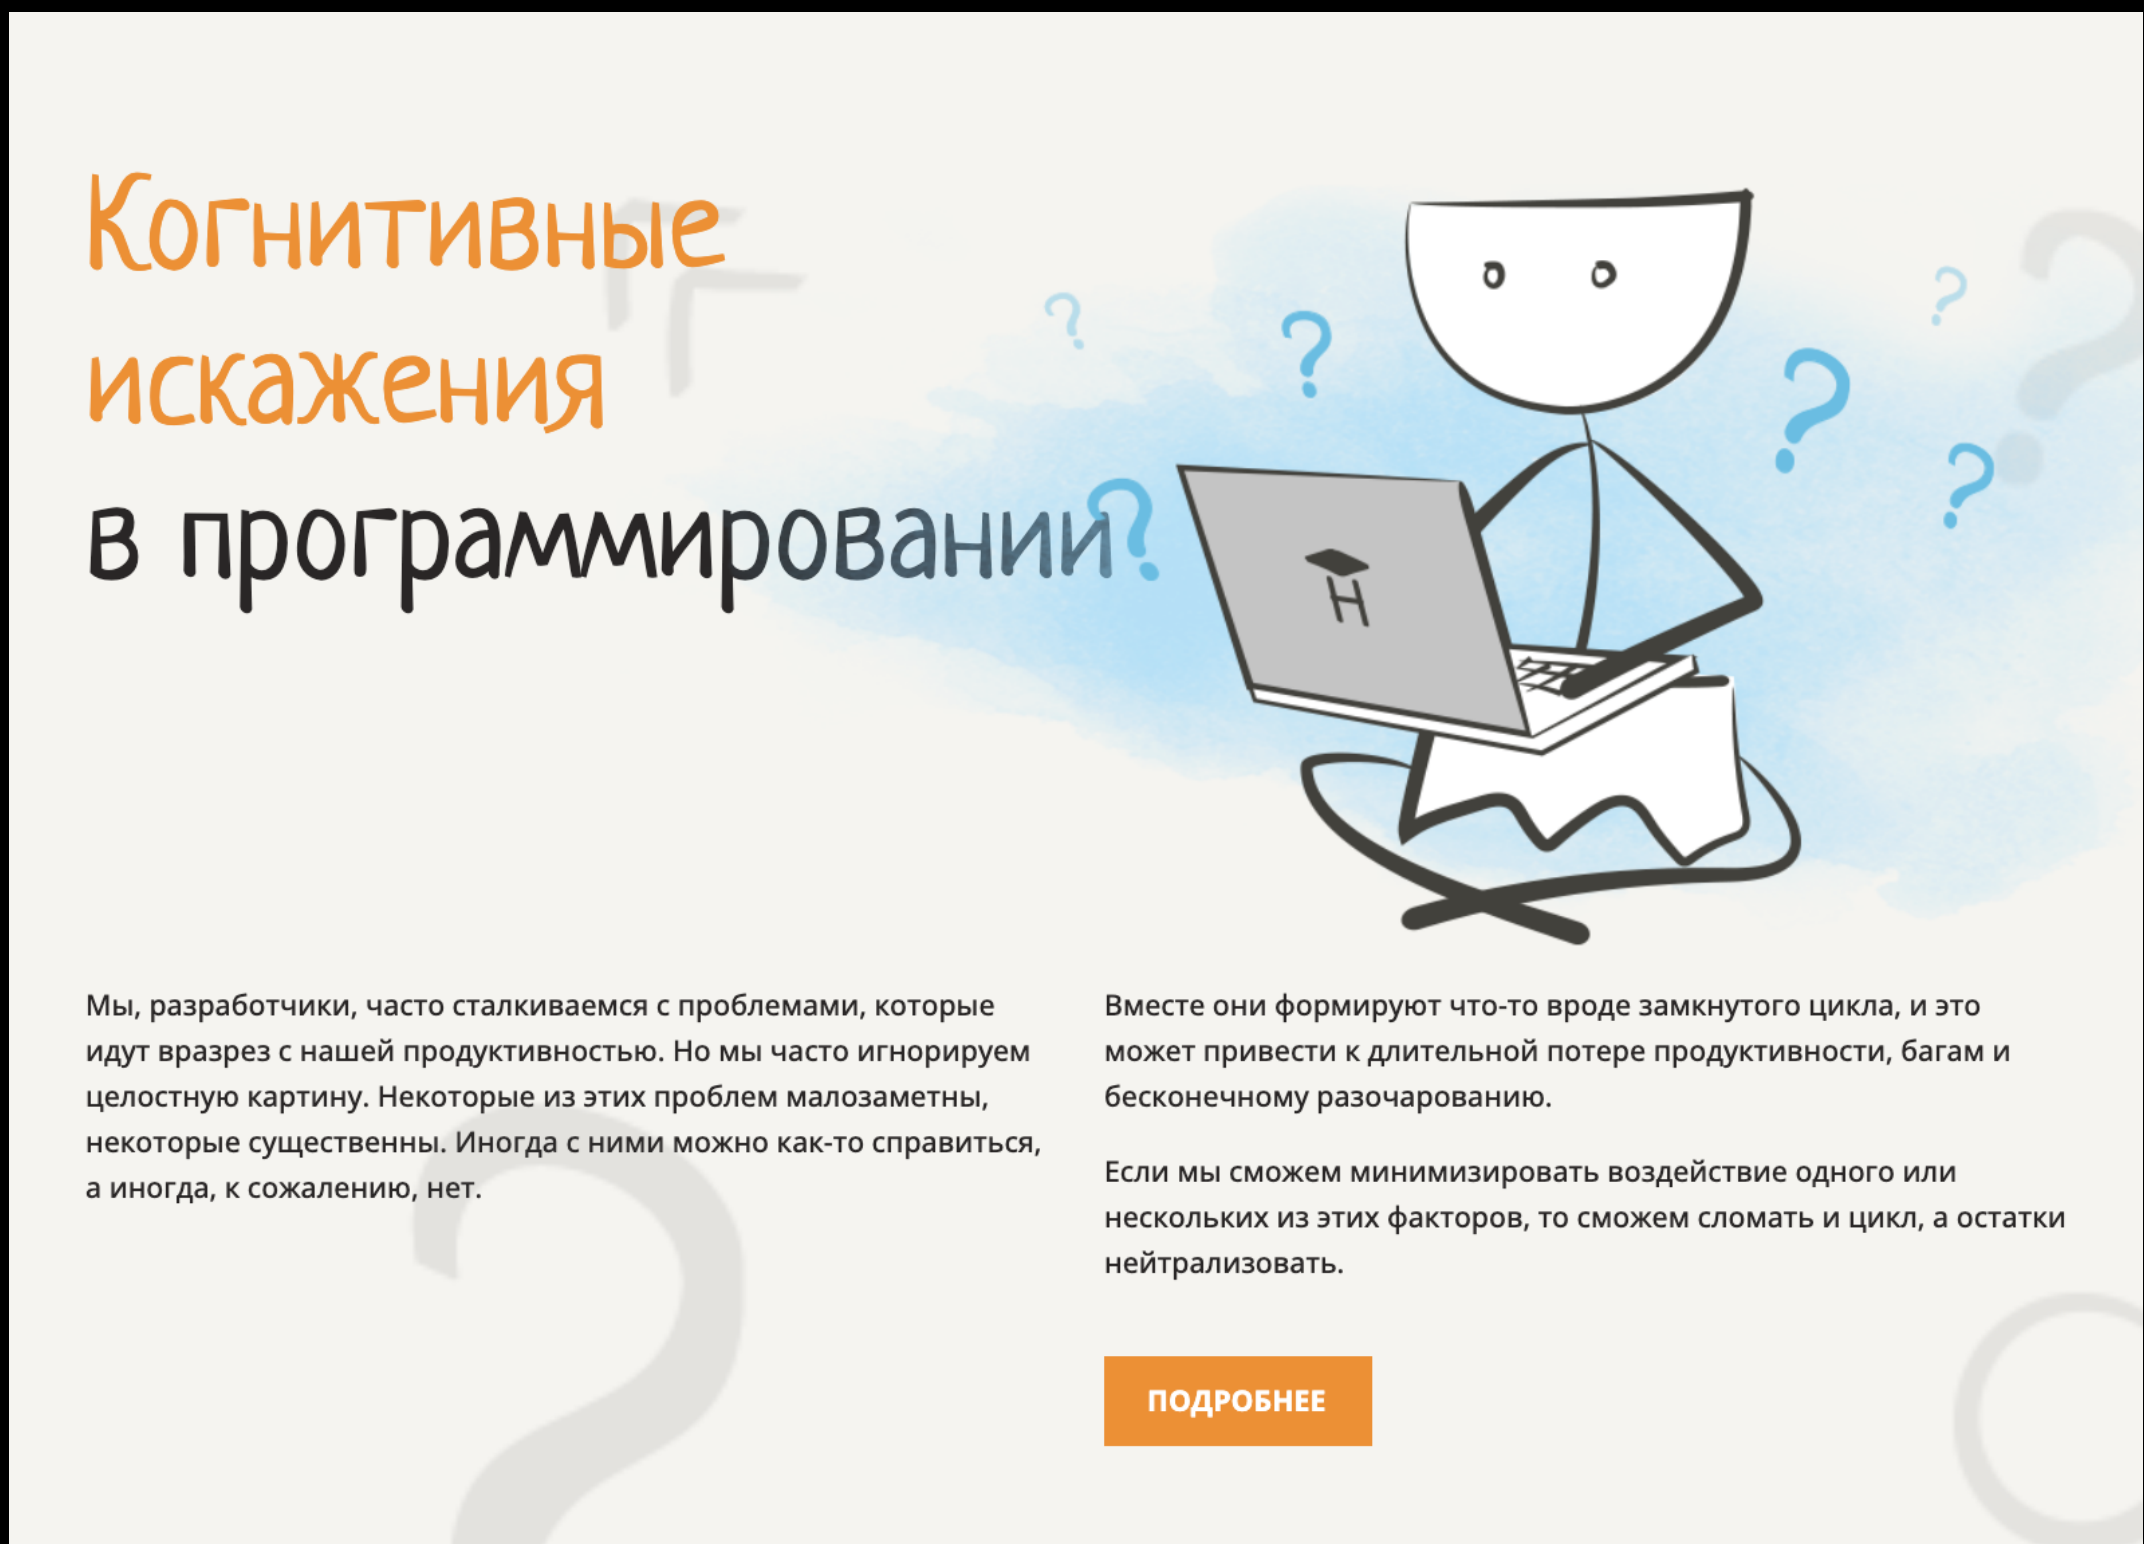

Education

School 21 - programming school from Sber	Specialization: "Economic Security" Siberian University of Consumer Cooperation (SibUPK)
April 2022 - till now	September 2014 - July 2019

Projects

Cognitive transformations in programming

Website layout

HTML, CSS

"Mind Games" is a set of five console games.

Each game asks questions that need to be answered correctly. After three correct answers, the game is considered to be completed. Wrong answers end the game and offer to play it again.

Games:

1. brain-calc - Arithmetic expressions to be evaluated.
2. brain-even - Definition of an even number.
3. brain-gcd - Finding the Greatest Common Divisor.
4. brain-prime - Definition of a prime number.
5. brain-progression - Search for missing numbers in a sequence of numbers.

JavaScript, ESLint, Git, GitHub Actions, readline-sync
